Learn more at claimacademystl.com/vet-prep.php and register to receive free online prep courses traditionally valued at **Over \$2,000.00 at NO COST!**

Intro to Java 1

This course introduces you to basic concepts of Java Programming, from Variables, to If-Statements, to Functions. This course is also used to assess potential students for acceptance into our programs.

Intro to Java 2

This course is more advanced and includes core Java concepts such as Loops, Arrays, Strings, Exceptions, and more. The course takes you step by step through the concepts with demonstrations and labs exercises to practice what you've learned."

About The Programs

Claim Academy offers Cybersecurity and Full Stack Software Developer programming that prepares students to begin fulfilling careers immediately after graduation as software developers, cybersecurity professionals, and more! Our next cohorts are coming soon!
