

DoD SKILLBRIDGE INTERNSHIP

Learn to safely and efficiently reduce emissions to ZERO with ZEVAC's patented vacuum and compression technology.

ZERO permits. ZERO venting. ZERO greenhouse. ZERO flaring. ZERO waste.

Z E V A C[®]

TPE MIDSTREAM LLC
Tulsa | Los Angeles | Pittsburgh
918-514-3166
www.tpemidstream.com

TPE is committed to the industry's effort to reduce emissions with a revolutionary, patented alternative to venting and flaring. Powered by compressed air, ZEVAC reduces noise and safely eliminates emissions without the need for permit applications. Our technology moves gas into the adjacent pipeline, allows the intake to depressurize and discharge back into your system, and keeps 100% of the gas inside the pipe.

TPE is the high-value provider in every pipeline equipment category we serve. Whether you need a short-term rental or long-term lease, we equip you with innovative and patented tools that allow you to be a leader in safe, responsible and environmentally friendly operations in the communities you serve.

SAFE & RELIABLE

- Reduces job-site hazards
- Removes the risk of venting and flaring
- Puts an end to high noise and odor

ENVIRONMENTALLY RESPONSIBLE

- Prevents methane release (or venting)
- Prevents flammable cloud formation
- Eliminates greenhouse gases

VERSATILE & CAPABLE

- 100% of product remains in pipe
- Allows emission-less operations
- Scalable across all pipeline pressures

INTERNSHIP OVERVIEW

You will learn:

- Abnormal Operating Conditions Operator Qualification
- Fundamentals of Pipeline Equipment (Launchers, Receivers, Filters, Separators)
- Pipeline Hydrostatic Testing
- ZEVAC[®] Fundamentals of Operation
- ZEVAC[®] Manufacturing
- ZEVAC[®] QC and Testing
- ZEVAC[®] Maintenance and Repair

Come help us dramatically alter GHG emissions in the Natural Gas Industry
